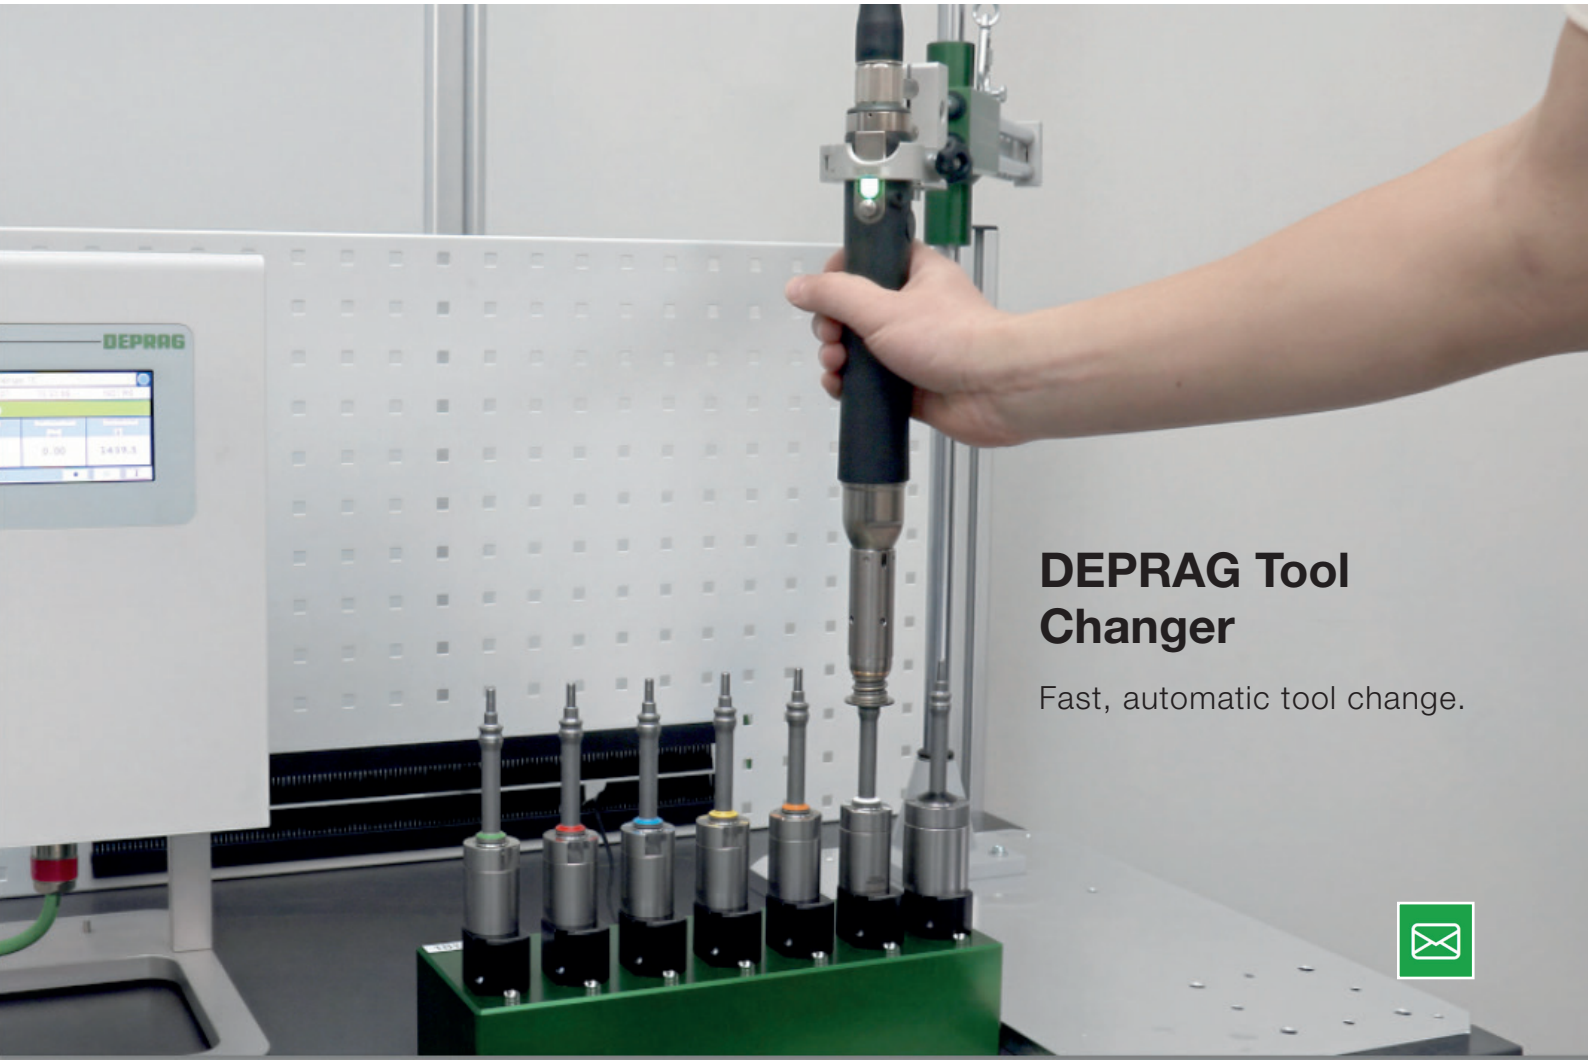
DEPRAG Tool Changer for Manual Workstations

DEPRAG machines unlimited



The DEPRAG Tool Changer enables faster bit changes with one hand. This saves time, reduces downtime, and ensures smooth processes—ideal for multi-product variants and different screws.

Advantages at a glance:

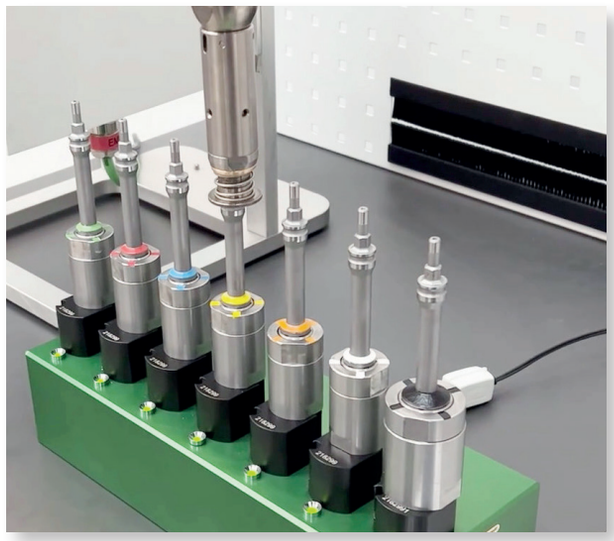
- **Significantly shortened setup times**
- **No manual search for bits**
- **Safe change without damage**
- **Can be combined with Toolbox**

DEPRAG Automation

DEPRAG Tool Changer – tool changing system for manual workstations

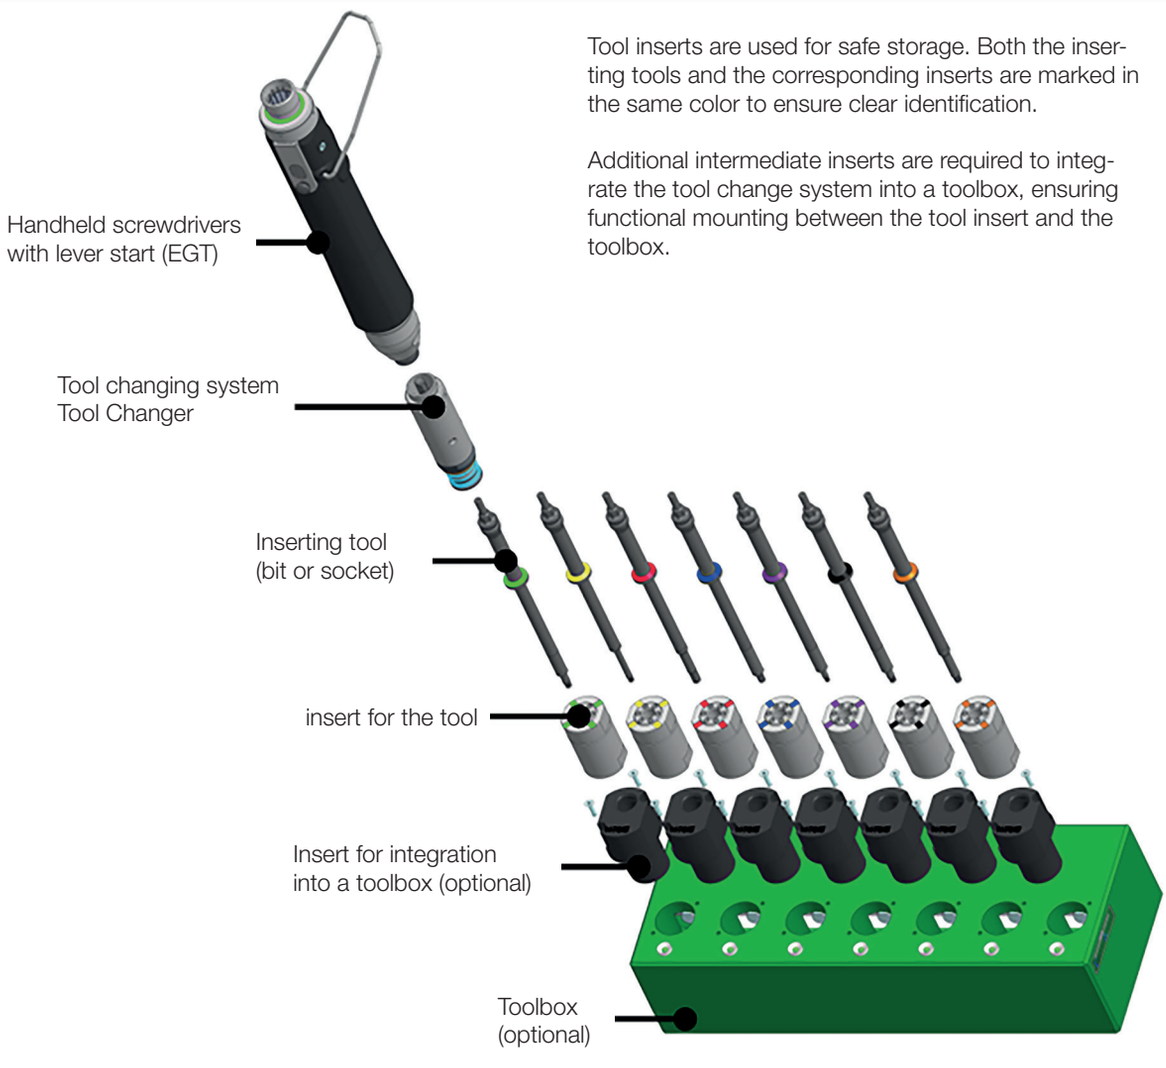
A quick-change system for insert tools (bits/sockets) is now available for the DEPRAG Plus screwdriving system handheld screwdrivers. It allows the user to change tools quickly and easily with just one hand.

The bits or sockets are taken directly from the designated tool inserts.



Structure

The quick-change system is designed for standard screwdrivers with lever start (EGT) and F6.3 output.



Tool inserts are used for safe storage. Both the inserting tools and the corresponding inserts are marked in the same color to ensure clear identification.

Additional intermediate inserts are required to integrate the tool change system into a toolbox, ensuring functional mounting between the tool insert and the toolbox.

DEPRAG Tool Changer — tool changing system for handheld screwdrivers with lever start			
Suitable for screwdriver series		**321EGT22, 321EGT27, 326EGT22, 326EGT27, 321EGT36**	**322EGT36, 327EGT36**
Tool changing system DEPRAG Tool Changer	Part no.	146589A	146589B
Insert for the tool (for inserting tools with a diameter of up to 8 mm)		application-specific
